ABDOMINAL SUPPORT UNIVERSAL

A-01

Sizes : Universal

Scientifically designed belt to compress the abdominal muscles to improve the muscle tone and reduce abdominal pressure. This product also helps to reduce postoperative abdominal pressure at the sutured area which helps in healing better and faster.

- Elasticised body ensures strong comfortable compression
- Monofilament elastic provides high aeration and patient comfort
- Flexi splints ensure no rolling over of the belt
- Hook and loop closures ensure a snug and secure fit

ABDOMINAL SUPPORT 8"

Sizes : S | M | L | XL | 2XL | 3XL

Scientifically designed elastic support that provides targeted compression to the belly muscles. It is great for helping after surgery and reducing the waist size after having a baby. The sleek design makes it suitable to wear even under clothes.

- Elasticised body ensures strong comfortable compression
- Monofilament elastic provides high aeration and patient comfort
- Flexible splints ensure no rolling over of the belt
- Broad hook and loop panels ensure a snug and secure fit
- Hand loop to wear product easily
- Sleek design suitable to wear under clothes

A-02

LUMBO SACRAL SUPPORT UNIVERSAL

A-04

Sizes : Universal

Superiorly designed product with pre-shaped semi-rigid splints to provide effective immobilisation and support. This product maintains the lumbosacral region in the neutral position and allays low back pain.

- Semi-rigid splint for effective immobilisation
- Pre-shaped splints for postural correction
- Elasticised body ensures strong comfortable compression
- Highly porous elastic improves ventilation and breathability
- Double pull mechanism provides extra compression

LUMBO SACRAL SUPPORT

A-05

Sizes : S | M | L | XL | 2XL | 3XL

Scientifically designed product with flexible back splints, in order to provide comfortable support to the back and to allay low back pain. The belt can be worn during daily routines and as a prophylactic aid. Excellent aesthetics ensures the product can be worn anywhere.

- Flexible back splints takes the shape of the lower back and provides optimal immobilization
- Soft cushiony back pad ensures comfort Highly porous
- Monofilament elastic provides strong compression with breathability.
- Double pull mechanism provides extra compression
- Broad hook loop panels ensure easy wearing and sizing flexibility

CONTOURED LUMBO SACRAL SUPPORT

A-06

Sizes : S | M | L | XL | 2XL | 3XL

Scientifically designed to support and immobilize the lumbo sacral region and correct the postural deformity to allay low back pain syndrome. It has rigid, malleable and contoured back splints which can be customized for correct posture and most effective immobilization.

- Pre shape aluminium splints provide correct support to the lumbo sacral region.
- Extra strong orthopaedics webbing for compression
- Hook loop fasteners allows perfect fitting
- Double pull elastic mechanism allows extra compression

LUMBO LACEPULL BRACE

A-07

Sizes : Universal

Lumbo Lace pull Brace is an advanced brace designed with a semi-rigid posterior back panel and multiple pulley-driven pull mechanisms to emphasise controlled and independent pressuring effects to stabilise lower back pain. It ergonomically braces the waist and requires lesser force for elderly users to achieve high compression and immobilisation. Recommended specifically for postoperative stabilisation and multi-level decompression.

- Ergonomic design of lace pull mechanism provides independent top and bottom pressures; degree of compression can be changed while wearing. Minimal force required to provide high compression.
- Anatomic back panel provides excellent fitting, rigid immobilisation and posture correction.
- High-quality and ventilated fabric enhances comfort for the user.
- Easy to use, lightweight, pleasing aesthetics, durable and long functional life.

TAYLOR'S BRACE

A-09

Sizes : Universal - Spl

A lightweight spinal brace that covers all dorsal, lumbar and sacral vertebrae supports and immobilizes the spine in a neutral position, still permitting the requisite body movement.

- Rigid, removable, customizable, anatomically contoured splints ensure perfect fitting, enhanced immobilization & right spinal posture.
- Adjustable shoulder straps offer neutral spinal posture, firm grip & self-tightening of the brace.
- Sleek, PUF fused body offers good cushioning, better comfort
- Convenient sizing in two heights & two circumferences.

RIB SUPPORT

Sizes : S | M | L | XL | 2XL | 3XL

Flexible elastic support for the thoracic and upper abdominal areas that compresses and binds the rib cage during rib fractures and postoperative treatment. It prevents chest movement and lessens discomfort brought by rib fractures or strained chest muscles.

- Elasticized body ensures strong comfortable compression
- Mono-filament elastic ensures high aeration and patient comfort
- Pad for localized gripe and support
- Semi rigid splints ensure no rolling of the belt
- Long hook loop panels ensure easy wearing and sizing flexibility
- Optimal width ensures wide coverage of the fracture and better immobilization of the area

A-10

CHEST BINDER

Sizes : S | M | L | XL | 2XL | 3XL

Ideal support to improve healing after thoracic surgeries. It is applied to the thoracic region to compress and bind the rib cage and provide splinting to the sternum. It is made from stretchable materials to allow sufficient flexibility for comfortable breathing.

- Elasticized body ensures strong compression
- Side pads improve compressive force and help in reduction of fracture and early bone healing
- Centre pad improves comfort and reduces vibration and allays pain
- Broad hook loop panels for easy wearing and sizing flexibility
- Optimal width ensures snug fit around the chest

A-11

ASH BRACE (HYPER EXTENSION BRACE)

Sizes : Universal

A-12

Scientifically designed to immobilize the vertebral column and maintain it in a neutral or slightly hyper-extension position. It provides stabilization of the spine and encourages cervical and lumbar lordosis, thus relieving pressure on the anterior parts of the vertebral bodies. It is designed to act on the three-point pressure principle by exerting pressure against the sternum and pubis on the ventral and the lumbar region on the dorsal.

- Anodized aluminium body has sturdy construction
- Can be shaped for perfect fitting and immobilization
- Easy, slide and screw mechanism ensures accurate height customization
- Anatomically shaped ether form covered pad with swivel joints offer an accurate interface and enhanced comfort
- Broad and rigid pad provides strong support to relieve the anterior pressure on vertebrae

PREGNANCY BACK SUPPORT

Sizes : S | M | L | XL | 2XL | 3XL

A-13

Scientifically designed product that provides support to the belly bump during pregnancy. By supporting the belly bump, this product helps to decrease pressure on the lower back and maintains the natural curve of the spine, reducing pain and improving posture. Its adjustable design helps to accommodate abdominal growth throughout pregnancy.

- Oblique design provides gentle support.
- Porous body ensures breathability and comfort.
- Broad hook loop panels ensure easy wearing and size flexibility.
- Abdominal panel lifts the belly bump and helps to maintain correct posture.
- Adjustable strap ensures customized and convenient wearing

HERNIA SUPPORT

Sizes : S | M | L | XL | 2XL | 3XL

A-14

Offers a gentle and constant relief from reducible inguinal hernia by providing adjustable and comfortable pressure to the hernia. On wearing the belt the occurrence of herniation gets eliminated.

- Anatomic pads, press the inguinal aperture at the correct angle, enhances effectiveness.
- Moulded Etha foam pads have appropriate hardness, are light in weight, smooth & comfortable.
- Adjustable pelvic & leg straps ensure that one size fits a large population & provide customized pressure.
- Soft and thermophilic
- Can be worn inconspicuously under the clothes.

CERVICAL COLLAR – FIRM DENSITY

B-01

Sizes : S | M | L | XL

Designed to support and stabilize the neck. It protects the neck and head from sudden jerks and vibrations. It is recommended where soft support to the cervical region is required.

- Medium-density foam provides firm support
- Optimal width ensures full neck coverage
- Anatomic design for a resting place to the chin
- Soft cotton cover ensures ventilation
- Wrap-around design ensures easy wearing
- Hook-loop closures for a snug and secure fit

CERVICAL COLLAR SUPPORT

Sizes : S | M | L | XL

Designed to support and immobilize the neck. It helps to prevent unnecessary neck movement and provides stability to the head and neck. It is recommended where significant immobilization of the cervical region is required

- Firm-density foam ensures immobilization
- LDPE sheet firmly supports the chin & jaw
- Eyelets improve air circulation
- Optimal width ensures full neck coverage
- Anatomic design for a resting place to the chin
- Soft cotton cover ensures ventilation
- Wrap-around design ensures easy wearing
- Hook-loop closures give a snug fit
- Thick, rounded edges do not bite into the skin

B-02

CERVICAL ORTHOSIS – PHILADELPHIA

B-03

Sizes : S | M | L | XL

Designed to immobilize and support the neck. The chin cup prevents unnecessary neck movement and provides stability to the neck and head. It is recommended where strong immobilization of the cervical region is required. The frontal opening makes it ideal for patients with tracheostomy, and the swollen balloon shape makes it an ideal collar for treating burn patients.

- Anatomical splints ensures rigid immobilization
- High-density foam provides optimal support
- The hole allows access to the windpipe
- Inbuilt chin cup for resting place to the chin
- Ventilation holes improve air ventilation
- Two-piece design ensures easy wearing
- Soft and hypoallergenic ensures comfort
- Optimal width ensures full neck coverage
- Hook-loop closures give a snug fit

CERVICAL HARD COLLAR

Sizes : S | M | L | XL

B-05

Designed to immobilize and support the neck. It prevents unnecessary neck movement and provides stability to the neck and head. It is recommended where strong immobilization of the cervical region is required.

- Rigid sheet provides strong immobilization
- Padded edge provides high cushioning
- Adjustable height to support different neck heights
- Anatomic design for resting place to the chin
- Soft fabric on the edges ensures comfort
- Ventilation holes improve air ventilation
- Wrap-around design ensures easy wearing
- Hook-loop closures give a snug fit

CERVICAL PILLOW – ROUND

Sizes : Universal

B-06

- Scientifically designed, contoured shape to support the neck in the resting position
- Provides rest to the neck muscles and relieves neck pain
- Made from premium quality, skin friendly, foam material which helps to provide excellent support and cushioning
- Use at home or while travelling
- Cervical spondylosis, Neck pain
- Stiffness in the neck and shoulders
- Neck muscle strain
- Spine alignment during sleep

CERVICAL PILLOW – REGULAR UNIVERSAL

B-07

- High-density PU foam to provide a firm but comfortable and soft support to the neck and head.
- The PU foam is anatomically shaped to provide a slight hyperextension of the neck.
- Covered with a soft velvet fabric for comfort

CERVICAL PILLOW CONTOURED UNIVERSAL

B-09

High-density PU foam to provide a firm but comfortable and soft support to the neck and head.
The PU foam is anatomically shaped to provide a slight hyperextension of the neck.
Covered with a soft velvet fabric for comfort

- Scientific design, maintains the neck in slight hyperextension and provides muscle relaxation
- Optimum density resilience and foam softness ensure comfort and effective support to the neck.
- The plush covering provides a soft feel, good aesthetics and durability.
- Extra-large size for enhanced comfort.
- Two heights, one for long-necked, the other for short.

POUCH ARM SLING – TROPICAL

C-01

Sizes : CHILD | S | M | L | XL | 2XL

Scientifically designed to give optimal support and immobilization to the fractured or post-surgical arm. It maintains the arm at a 90-degree angle at the elbow joint which promotes both healing and comfort. The ingenious sling design promotes healing and comfort by securely holding the arm in a stable position.

- Durable fabric holds heavy casts easily
- Functional design covers and supports the cast optimally
- Thumb cradle holds the thumb and keeps the arm in an accurate position.
- Secure closures ensure easy application and removal.
- Adjustable sling ensures correct positioning and an accurate fit.
- Shoulder pad provides support for arm weight

POUCH ARM SLING – BAGGY

C-02

Sizes : CHILD + S | M | L | XL | 2XL

Scientifically designed to give optimal support and immobilization to the fractured or post-surgical arm. It maintains the arm at a 90-degree angle at the elbow joint which promotes both healing and comfort. The ingenious sling design promotes healing and comfort by securely holding the arm in a stable position.

- Durable fabric holds heavy casts easily
- Functional design covers and supports the cast optimally
- Thumb cradle holds the thumb and keeps the arm in an accurate position.
- Secure closures ensure easy application and removal.
- Adjustable sling ensures correct positioning and an accurate fit.
- Shoulder pad provides support for arm weight.

UNI SHOULDER IMMOBILISER

C-03

Sizes : Universal

Scientifically designed product that immobilizes the shoulder and upper arm in neutral position. It supports the injured arm and helps to alleviate pain by facilitating the healing. Its sleek construction and effortless design make it a preferred choice for those who prioritizes comfort.

- Scientific design immobilizes the arm in a required position
- Arm restraint band ensures strong immobilization
- Thumb cradle holds the thumb and keeps the arm in an accurate position
- Convenient design to wear the product easily
- High quality materials give comfortable cushioning
- Double shoulder strap reduces load
- Moulded hook loops ensure secure application & easy removal

ELASTIC SHOULDER IMMOBILISER

Sizes : S | M | L | XL | 2XL

C-04

A lightweight, sleek and smart design to provide immobilization in shoulder dislocation and post-operative rehabilitation of the shoulder. It reduces abduction and arm rotation by positioning the arm close to the body.

- Scientific design for four-way immobilization
- Shoulder cup for grip and strong immobilization
- Mono filament elastic panel has high porosity ensures high aeration and patient comfort
- Wrist and upper arm cuff ensure better comfort and positioning
- Chest band for ensures snug fitting, strong compression and pain relief

CLAVICLE BRACE – VELCRO

Sizes : S | M | L | XL | 2XL

C-05

A smart and a comfortable brace designed to immobilize, compress & stabilize fractures, involving the clavicle bone. It ensures linear union and no telescoping of the fractured clavicle bone.

- Reverse buckle fastening with hook loop tapes offer better tightening and grip.
- PU foam padding ensures no underarm rash on one hand and better comfort and compliance on the other.
- Figure of eight design with lateral vector, ensure linear union of the bone & also easy application and tightening of the brace.
- Plush fabric offers skin friendly interface.

CAST SHOE – TAPERED SOLE

Sizes : S | M | L | XL

C-06

Replaces the functions of the normal shoe when the patient is on a foot cast. It prevents excessive wear & tear of the cast and reduces impact on the injured leg. It ensures high hygiene and improves the patient's gait on the foot cast. The design ensures easy wearing and removal.

- Strong and Durable Upper protects the cast.
- Prevents soiling and mechanical damage.
- Quick drying material with enhanced aesthetics.
- Uniquely designed hook loop closure system ensure good grip, flexibility in sizing and ease of application & removal.

SHOULDER SUPPORT

C-07

Sizes : S | M | L | XL

Scientifically designed to provide protection, support, compression and warmth to the shoulder joint. Helps to correct alignment of the shoulder joint following dislocation or subluxation. It restricts the shoulder movement, protects the shoulder from injuries due to sudden jerks, provides warmth, improves healing and manages pain

- Anatomical contoured design to provide perfect fitting
- Controlled compression to support shoulder joint optimally
- Four way stretch for better fitting and enhanced comfort
- Adjustable oblique strap with auxiliary pad
- Optimal heat retention for pain relief and quick healing

KNEE CAP

D-01

Sizes : S | M | L | XL | 2XL

Compression sleeve to hold and compress knee muscles, to enhance the performance of players by increasing muscle density and blood circulation around the knee. It also provides strong support and protection to ligaments and tendons thereby reduces the chances of wear.

- Porous and airy for proper ventilation, quick sweat drying and overall comfort
- High compression for improving performance and stability
- Four way stretch for a great fitting and enhanced comfort
- Sleek design- comfortable to wear under clothes
- High stretch-ability for ease of wearing.

ELASTIC KNEE HINGED SUPPORT

Sizes : S | M | L | XL | 2XL

Versatile knee support which offers the advantage of knee delousing, lateral immobilization and controlled compression around the knee. It allows normal flexion and free movement of the knee joint.

- Strong aluminium hinges provide rigid side splinting & free flexion movement.
- Open patella with cushion, release the patellar pressure, improves comfort.
- Can be used for Patella - femoral problems.
- Wrap design allows customized compression and easy application on swollen, geriatric or asymmetric knees.
- Large dorsal opening ensures no buckling or constriction.

D-02

KNEE BRACE – LONG (20")

D-03

Sizes : S | M | L | XL | 2XL

Scientifically designed to effectively immobilize and support injured or post-operated knee joints, promoting a secure functional position. This skin-friendly brace ensures prolonged comfort during extended use. Its open wrap-around design enhanced convenience for patients, facilitating easy wearing and removal while prioritizing comfort.

- Pre-shaped anatomical splints ensure strong immobilization
- High quality foam ensures comfortable cushioning
- Broad Knee strap perfectly covers the knee
- Wrap-around design makes it easy to use
- Multiple hook loop straps ensure no migration of the brace

KNEE BRACE – SHORT (14")

D-04

Sizes : S | M | L | XL | 2XL

Scientifically designed to effectively immobilize and support injured or post-operated knee joints, promoting a secure functional position. This skin-friendly brace ensures prolonged comfort during extended use. Its open wrap-around design enhanced convenience for patients, facilitating easy wearing and removal while prioritizing comfort.

- Pre shaped anatomical splints ensure strong immobilization
- High quality foam ensures comfortable cushioning
- Broad Knee strap perfectly covers the knee
- Wrap around design makes it easy to use
- Multiple hook loop straps ensure no migration of the brace

ROM KNEE BRACE

Sizes : UNIVERSAL

D-05

Controls and restricts degree of flexion of the knee joint through a multi-point fixation system to allow a range of motion or immobilization to the knee. Universal design allows it to be used on most patients and for multiple orthopaedics problems.

*Use this product under the guidance of a qualified doctor.

- Range of Motion from 0 to 120 degree flexion and 0 to 60 hyper extension with locking intervals at 15 degrees.
- Pleasurable locking, using easy pull mechanism.
- Straps with reverse buckle mechanism provides controlled tightening.
- It is easy to wear.
- Neoprene liner with silicone coating enhances product grip, improves cushioning and comfort.
- One size fits all.

PREMIUM KNEE CAP

Sizes : S | M | L | XL | 2XL

D-06

Elasticated compression sleeve to hold and compress knee muscles, to enhance the performance of players by increasing muscle density and blood circulation around the knee during sports, gyming and training. It also provides strong support and protection to ligaments and tendons thereby reduces the chances of wear and tear during workouts. Special 3D design pocket to reduce pressure on patella and holds patella in place

- Porous and airy for proper ventilation, quick sweat drying and overall comfort
- High compression for improving performance and stability
- Soft patellar region to hold patella in position during physical activity
- Four way stretch for a great fitting and enhanced comfort
- Sleek design- comfortable to wear under clothes
- High stretch-ability for ease of wearing.

ANKLET

E-01

Size : S | M | L | XL

Product, to provide mild compression, warmth and support to the ankle joint. It is used to allay pain and inflammation, generally associated with old age, arthritis or injury. Woven in 3 dimensions it conforms to the complex anatomy of the ankle with exactness.

- Thermophilic cotton inside ensures, comfort in all weather conditions.
- Nylon outside ensures durability, excellent aesthetics & colour fastness.
- Two layered with interwoven air space retains therapeutic warmth.
- Pleasing aesthetics.

ANKLE WITH BINDER

Sizes : S | M | L | XL

An effective device to support, compress and partially immobilize the ankle following injury or sprain to control pain, oedema or inflammation. Composed of two components, compression sleeve and elasticized strap. The sleeve is knitted in 3 dimensions so that it conforms to the complex anatomy of the ankle with exactness

- 3 D, knitting with mellowed heel spot, ensures snug fitting, strong compression, comfortable ankle movement and perfect conformance to the complex anatomy of the ankle.
- Elasticized wrap in figure of eight stabilizes the ankle, and controls inversion/aversion & plantar flexion.
- Dermo- phallic cotton ensures, comfort in all weather conditions.
- Nylon outside ensures durability & nice aesthetics.

E-02

ELASTIC ANKLE BINDER

Size : Universal

E-03

Ankle wrap sleek is an effective device to support, compress and partially immobilize the ankle following injury or sprain to control pain, oedema or inflammation. Composed of two components, compression sleeve and elasticized strap. The sleeve is knitted in 3 dimensions so that it conforms to the complex anatomy of the ankle with exactness.

- Provides controlled & strong compression, perfect fitting and comfortable ankle movement.
- 3D construction and anatomical shape provides perfect conformance to the complex anatomy of ankle.
- Elasticized wrap in figure of eight improves ankle stability and controls inversion/aversion injuries.
- BI layered and four way stretchable fabric ensures enhanced compression, retains body heat, allays pain and improved comfort.
- Easy to use, washable, thermophilic (no rash/allergy), good aesthetics, long functional life and durable.

FOOT DROP SPLINT – RIGHT/LEFT

Sizes : S | M | L | XL

E-04

Designed with a dorsal shell made of polypropylene with a leaf spring action to arrest the plantar flexion movement and lift the foot. It supports and stabilizes the ankle and foot in all foot drop conditions. Designed to aid in swing phase toe clearance and to reduce plantar flexion impact in the early stance.

- Polypropylene body offers better durability and resilience.
- Leaf spring action assists the walking process.
- Rigid construction and anatomical design provides support & maintains the hemiplegic foot in functional position.
- Can be customized.
- Can be worn with or without shoe.
- Inbuilt hook loop closures & padding ensure better fitting, comfort & ease of application.

ANKLE SPLINT

Sizes : Universal

E-05

Designed to immobilize, support and stabilize the ankle joint. in injury, or offer protection to people prone to ankle injuries. Rigid exoskeleton shell design gives better protection and control of the inversion or aversion of the ankle.

- Moulded splint with perfect anatomy ensures good immobilization.
- Unique figure of eight strapping improves grip and control on inversion/eversion movement.
- Moulded Etha foam pad provides optimal cushioning.
- Large room for ankle can accommodate, swollen or distorted ankles.
- Neoprene sleeves protect from abrasion and pressure of tight straps.

WRIST BAND – DOUBLE LOCK

F-01

Size : Universal

This wrist binder can be used for Wrist sprain/strain, Sports injury, Wrist tenosynovitis, Ganglion cyst and other conditions causing pain and discomfort in the wrist and requiring mild support.

- Designed to relieve pain by offloading the muscles of the wrist.
- Brace provides an ideal compression & reduces the load on the strained muscles of the wrist.
- Provides an immediate noticeable therapeutic relief to the wrist.

WRIST BRACE WITH THUMB

Size : Universal

Designed to support, protect and partially immobilize the wrist and the palm while allowing free and natural movement of the thumb and fingers. It compresses the area and retains the body heat to allay local pain and inflammation.

- Strong elastic with excellent compressive strength, supports, protects & provides requisite immobilization of the wrist.
- Striped elastic with excellent porosity ensures excellent comfort.
- Anatomical thumb opening is designed for slight abduction and comfort of the thumb.
- Allows free movement of the thumb & fingers.
- One piece fits both hands.

F-02

ELBOW SUPPORT

Size : S | M | L | XL

Widely used in orthopaedic practice to provide firm compression, warmth & support to the forearm and the elbow joint, to allay pain inflammation and stiffness, generally associated with old age, arthritis, sports injury etc

- Anatomically shaped with extra stretch at elbow allows easy elbow movement, better comfort, better compression and grip.
- High quality Nylon – Spandex yarn provides four-way stretchability for snug fitting and excellent compression.
- Long life, soft feel, excellent aesthetics and colour fastness.
- Retains body heat for quicker healing.
- Elasticized band provides controlled and targeted compression at the site of inflammation.
- Allays pain and reduces vibration.

F-03

COCK UP STATIC SPLINT–ALUMINUM RIGHT / LEFT

F-05

Size : S | M | L | XL

Static Cockup Splint is recommended for use in cases of stiffness and contracture of the hand and fingers. It is designed with high-density moulded fibre. It includes 6 adjustable Velcro straps to maintain it in a suitable position and to retain progressive stretching. The adjustment with the aluminium bar can be varied in any position.

- This is a resting hand splint for dealing with hemiplegia
- It includes 6 adjustable Velcro straps to maintain it in a suitable position and to retain progressive stretching
- The adjustment with the aluminium bar can be varied in any position

FINGER COT

Sizes : S | M | L

G-01

Finger Cot is designed to provide a strong protective cover around an injured, burnt, fractured, surgically operated, recuperating finger. It provides a convenient and cost effective treatment for various kinds of medical conditions of the fingers. Available in various sizes, to suit the individual finger lengths.

- Provides protective support and immobilization to the finger in case of injury, fracture or burnt.
- Ergonomic design with U shape ensures full protection, easy wearing and good ventilation.
- Inbuilt hook loop tape provide close fitting, excellent grip and easy application.
- Ethafoam lining gives enhanced cushion and comfort to the user.
- Easy to use and maintain, good aesthetics, Light weight, durable and long functional life.

FROG SPLINT

Sizes : S | M | L

Designed to support and immobilize the inter-phalangeal joints of the fingers in their natural functional positions. It provides a convenient and cost-effective treatment for various kinds of medical conditions of the fingers.

- Strong aluminium body provides rigid immobilization.
- Malleable arms, can be shaped for good grip.
- Anatomic design Immobilizes all joints in neutral position.
- Sleek, well ventilated, comfortable, does not restrict the movement of other fingers.
- "Etha foam" lining gives enhanced cushioning & comfort, it is also easy to clean.
- Available in various sizes, to suit the individual finger lengths.

G-02

MALLET FINGER SPLINT

Size : Universal

G-03

Mallet Finger Splint is a very simple device, to maintain the distal interphalangeal (DIP) joint in the dorsi flexion position or functional position. The immobilization of these phalanges is important in managing the fractures, or dysfunctionality of the DIP joint.

- Provides rigid immobilization to the finger and malleable can be bent & customized.
- Ergonomic and practical design to maintain requisite hyper extension of DIP joint.
- Inbuilt hook loop tape provide close fitting, excellent grip and easy application.
- Ethafoam lining gives enhanced cushion and comfort to the user.
- Easy to use and maintain, good aesthetics, Light weight, durable and long functional life.

FINGER EXTENSION SPLINT

G-04

Sizes : S | M | L

Designed to immobilize and protect a finger with metacarpal injury, fracture, or after the surgery while it recuperates. It provides a convenient and cost-effective treatment for various kinds of medical conditions of the fingers.

- Strong aluminium body ensures rigid immobilization.
- Malleable, can be bent and customized.
- U design ensures full protection, easy wearing & good ventilation.
- "Etha foam" lining gives enhanced cushioning & comfort, it is also easy to clean.
- Inbuilt hook loop tape provide close fitting, excellent grip and easy application.

COMPRESSION STOCKING BELOW KNEE

M-02

Sizes : S | M | L | XL | 2XL | 3XL

Provides compression, which is strongest at the ankle and gradually decreases as we move up. This controlled and graduated compression effectively stops any abnormal backflow of blood. They compress the outer walls of superficial veins to make them strong and prevent varicose veins

- Anatomical shape and graded Spandex ensures accurate compression for effective blood evacuation.
- High quality Nylon yarn is thermophilic, provides excellent aesthetics and colour fastness.
- Closed heel and Open toe design reduces wear and tear, is easy to wear and improves comfort.
- Top Silicone band ensures no slippage and no constriction

COMPRESSION STOCKING ABOVE KNEE

Sizes : S | M | L | XL | 2XL | 3XL

Provides compression, which is strongest at the ankle and gradually decreases as we move up. This controlled and graduated compression effectively stops any abnormal backflow of blood. They compress the outer walls of superficial veins to make them strong and prevent varicose veins.

- Anatomical shape and graded Spandex ensures accurate compression for effective blood evacuation.
- High quality Nylon yarn is thermophilic, provides excellent aesthetics and colour fastness.
- Closed heel and Open toe design reduces wear and tear, is easy to wear and improves comfort.
- Top Silicone band ensures no slippage and no constriction.

M-03

ANKLE WEIGHT CUFF

M-04

This weight cuff is used for physical therapy, rehabilitation and gym exercises, strengthening of muscles and joints, endurance and balance training, sports specific training.

Made from skin-friendly fabric for a soft and comfortable feel. Reverse buckle locking with hook and loop closure for easy adjustment. Available in different weight levels like ½ kg, 1 kg, 2 kg, 3kg,

WRIST WEIGHT CUFF

M-05

weight Cuff is designed for a complete physiotherapy program. It has a long and double safety hook and loop closure for easy adjustment and a secure fitting. It is designed for a snug fit, ease of wearing and no migration during exercise. The extended flap improves grip and protection from Velcro strap bite. Can be ideally used for passive exercise programs and active exercise programs for paraplegics, invalids, and Gym goers. Weight cuff helps in improving muscle strength, muscle tone and stamina through isotonic resisting exercises. It can drastically improve the effectiveness of walk, running and aerobic.

- Weight cuff is ideal for strength gain, general physiotherapy and rehabilitation. This can be used during normal chores to improve strength and stamina.
- Hook loop safety and reverse buckle mechanism ensures complete safety & prevents falling.
- Smooth steel balls glide ensures soft feel, no injuries, ease of wearing thigh ting.
- Aerodynamic shape with high quality material ensures good grip, better aesthetics and high cushioning.

FINGER EXERCISER

Size : Universal

- Device for the hands that aims to increase finger dexterity, flexibility, and strength.
- Includes a sturdy plastic body and four metal springs to prevent finger compression.
- Non-slip grip and ergonomic design for comfort and stability while using.
- Lightweight and portable, allowing users to exercise their fingers anywhere they go.
- It is a useful tool for musicians, athletes, rehab patients, and people with arthritis or other hand-related ailments since users may select from a number of workouts to target specific muscles and enhance finger coordination

M-06

EXERCISER BALL SET

Size : Universal

Exercising ball is an excellent physiotherapy device to provide a pleasurable exercise plan for the hand, wrist, forearm and the finger.

- Compact size to hold and good for forearm, wrist, hand and finger exercises
- Excellent resilience with long functional life.
- Compatible for thermal and hydrotherapy.
- Flexible and pleasurable exercise plans can be designed to give better compliance.
- Material used make it safe to use.

M-07

SHOULDER EXERCISER KIT

Size : Universal

- For range of motion, stretching and strengthening exercises
- Easy to use, convenient to store with pulley
- Durable and light weight, Compact and portable for Home | Office | Travel
- Includes pulley with 'S' hook | Two handles | Rope | Clean to adjust the rope length

M-09

HEATING PAD

Size : Universal

A heating belt delivers joint and muscle pain through safe and effective heat therapy. The orthopaedics heating pad enables uniform warmth to the affected area, providing instant relief. Heat promotes vasodilation of blood vessels, improving blood circulation, easing pain in muscle stiffness, and supporting faster recovery over time.

Do not use while sleeping, Do not wash, Do not iron, Hand wash cover only, Do not fold, Keep away from children. Do not use more than 1 hour.

M-10

CREPE BANDAGE

Sizes : 6cm | 8cm | 10cm | 15cm

Provides firm compression, warmth and support for swelling reduction, injury stabilization, and tissue support.

- High stretchability gives required compression.
- Fast edges ensures long functional life.
- Elastic clips holds bandage in place.
- Wrap around design makes it easy to wear.
- Hypoallergenic skin friendly elastic.

M-11

ORTHO STOCKINETE 10 METER

M-13

Ortho Stockinette 10 M is a 100% cotton garment woven on state-of-the-art circular looms, and is made from the finest long staple cotton yarn. There are three types of colours available for this product: non-absorbent Gray, absorbent beige, and ultra white. A hypoallergenic treatment is applied to the absorbent varieties during the process of dyeing, washing and finishing in order to make them hypoallergenic.

Using long loops to knit a fabric provides the fabric with the ability to stretch in four directions at the same time.

HIGH QUALITY FINE LONG STAPLED COTTON

It remains cool in summers & warm in winters. It is hypoallergic and soft to touch. It is soft to touch and is breathable.

COCCYX CUSHION

Size : Universal

M-14

Anatomically designed to provide a correct seating posture, distribute body weight, minimize pressure points and guide the lower back to its neutral position. Thighs are well received by the anatomic contours to ensure comfort and correct seating posture.

- High density, superior quality PU foam with high elastic properties, to provide firm support, high cushioning and desired comfort.
- It is anatomically designed and has a cut out for anal and the tail bone area relief.
- Plush covering for optimal comfort
- Long sitting office hours
- Lightweight
- Premium aesthetics
- Sleek, Anatomic design
- Relief for tail bone
- Portable
- Washable

BACK REST

Size : Universal

M-15

A lightweight and portable support, which maintains the spine in its neutral position. It can transform any normal chair, or car seat to an ergonomic device to provide optimum support to the spine. Ideal for long sittings, in office, travel or home

- Anatomic design, maintains the natural low back curve & relieves the anterior pressure on the vertebrae.
- Side supports hold the body and enhance comfort.
- Elasticized holding straps at the back help in fixing the Back rest to the seat.
- High density of PU foam used offers high resilience, better cushioning
- Durable and long functional life
- Removable and washable cover gives plush looks to match, car or office interiors.

TENNIS ELBOW SUPPORT (NEOPRENE)

N-05

Sizes : Universal

Designed to help provide relief from generalized pain and tenderness in the forearm and elbow caused by repetitive strain injury due to strong grip or active finger movement. It is quite often used by industrial workers etc

- Breathable PUF fused fabric give excellent aesthetics, comfort and long life.
- Reverse buckle strapping ensure strong grip and firm compression.
- Silicon pad interface absorbs impact and vibration very effectively, it provides proprioception and quick healing.
- Smart and sporty, can be used both for therapeutics and prophylaxis.

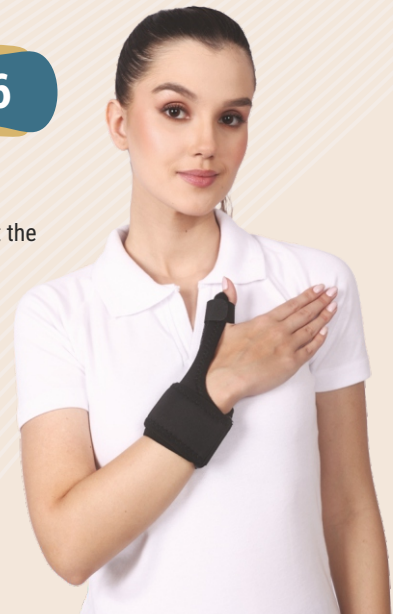

THUMB SPICA SPLINT (NEOPRENE)

Sizes : Universal

Designed to immobilize the thumb in the abduction (functionally neutral) position. Support the CMC joint and immobilize the MCP joint of the thumb without inhibiting hand movement.

*Use this product under the guidance of a qualified doctor.

- Removable malleable splint provide customized abduction of the thumb.
- Strong splinting ensures excellent immobilization and stability to CMC & MCP joints of the thumb.
- Durable, PUF fused body provides excellent aesthetics and comfort.
- Sleek design allows full hand and finger movement.

N-06

COCUP / WRIST SPLINT (NEOPRENE)

N-07

Sizes : Universal

Designed to immobilize and provide firm support to the hand and wrist in various orthopaedics conditions. It maintains the wrist in the dorsiflexion/ functional position while allowing full range of motion to the fingers and thumb. It compresses and retains the body heat to allay the local pain and inflammation. The product can be removed to permit, therapy sessions, washing and hygiene.

Made of strong and porous, high-quality elastic, which ensures adequate compression, strong support and durable product.

- Removable and malleable splint ensures good immobilization, helps in customized fitting and achieve a required degree of dorsiflexion.
- Built-in opening for thumb abduction for neutral positioning and quick healing.

FOREARM SPLINT (NEOPRENE)

N-08

Size : Universal

Designed to immobilize and provide firm but comfortable support to the hand and wrist in various orthopaedics conditions. It maintains the wrist in the neutral/functional position.

- Made of breathable PUF fused fabric which ensures excellent aesthetics, comfort and a long life.
- Removable and malleable splint ensures good immobilization, helps in customized fitting and achieving required degree of dorsi-flexion.
- Top edge abuts the palmer crease to allow free hand and finger movement.
- Long length of the brace provides enhanced immobilization and quick relief.

KNEE HINGED SUPPORT (NEOPRENE)

Sizes : S | M | L | XL | 2XL

N-09

Knee support which offers the advantage of controlled compression around the knee and the rigid side support of a splint. It allows normal flexion and free movement of the knee joint.

- The bi axial, strong hinge ensures full weight bearing and free and natural knee flexion.
- Silicone patellar padding compresses the patellar tendon, relieves patellar pressure, positions patella in patellar dislocations.
- Anatomic construction ensures strong support and a comfortable fit.
- Anti tourniquet strapping ensures snug fit but no constriction to blood flow.
- Ideal Neoprene fabric construction with a four way stretch, t
- Strong nylon fabric which ensures a long life, good aesthetics and colour fastness.
- Ergonomically shaped to provide good grip around the knee anatomy and ensures no bunching on knee bending.
- Hook and loop closures provide snug and secure fit

ANKLE BRACE (NEOPRENE)

Size : Universal

N-10

Designed to give support, compression and controlled immobilization to weak or injured ankles. The stabilizing splint supports the ankle where it most needs to prevent an ankle injury. It can be used in high-impact sporting activities or by individuals with common repetitive ankle injuries. It also helps to control swelling, oedema or sprains and rollovers of the ankle.

- Semirigid splint arrests the inversion and aversion motion, enhances grip in sprains and ankle roll overs.
- Wrap around wearing ensure easy application, removal and customized compression.
- Neoprene fabric ensure comfort, durability and better grip.
- It retains heat for faster healing and pain relief.
- Anatomical, sleek design ensure perfect fitting and use inside the shoe.

EXERCISING GEL BALL (LARGE)

P-01

Provide three levels of resistance to strengthen muscles of the hand, fingers and forearm in progression. It relieves pressure on arthritic joints, and helps to increase the strength and dexterity of hands after a stroke

- High resilience
- Long functional life
- Three level of resistance for progressive and complete hand therapy
- Designed in an egg shape with optimum size
- Fits perfectly in palm and fingers
- Textured surface improves feel and grip.
- Made of superior quality gel with high resilience
- Provide extreme cushioning
- Firm support and desired resistance.

HEEL CUSHION GEL

Size : Universal

P-05

Designed to provide soft cushioning to the foot heel. Gel spot at the site of calcaneus distributes and reduces pressure and relieves pain. Anatomically designed for better comfort and fitting.

- Transparent Silicone has high cushioning coefficient, excellent shock absorption/energy return and long functional life.
- It is odourless, hypoallergenic, easy to clean and esthetical pleasing.
- Soft Spots relieve pressure at the base of the calcaneus and provide focused pain relief.
- The honeycomb structure further enhances shock absorption properties.

FOOT/SKIN TRACTION SET

R-01

Size : Universal

The Skin Traction Kit provides below-knee traction to limbs after injury & surgery. Maintains the alignment of bones after a traumatic injury. Locks harmful movements. The Skin Traction Kit strips provide maximum aeration to the skin while securely holding its centre extremity to the spreader at the foot end. An elasticated long restraint bandage provides firm fixation to all sides of the limb.

Handwash with mild detergent and water at room temperature. Do not dry clean, iron or bleach

LEG TRACTION BRACE

R-02

Size : S | M | L | XL | 2XL

Leg Traction Brace is designed for effective leg traction, ensuring stability and comfort. Made with high-quality materials, it provides controlled support to aid in recovery from injuries, fractures, and muscle strains. This orthopaedics leg brace is adjustable for a custom fit, ensuring maximum effectiveness. Ideal for physiotherapy, it enhances mobility and reduces discomfort. With its ergonomic design, it offers long-lasting support. Suitable for home or hospital use, the Leg Traction Brace is a must-have for leg recovery.

- Multiple hook loop closures ensure controlled compression along with easy application and removal.
- Large Skin contact area eliminates need for adhesives or over tightening.
- Sandwiched fabric offers cushioning, grip, soft feel and durability.
- Skin facing layer provides good frictional property.

PELVIC TRACTION KIT

R-03

Size : S | M | L | XL | 2XL

Pelvic Traction Kit With Weight Bag is a traction system intended to apply uniform and controlled traction to the lumbar, sacral and thoracic areas of the vertebral column. Pelvic traction belt, like a halter, holds the pelvic area.

- Pelvic traction belt through its straps on the two sides gets attached to the spreader bar and the traction pulley system
- Can be conveniently used at homes or hospitals
- Sturdy design for long life and multiple uses
- Large hook loop area provides customized compression and flexibility in sizing
- Adaptable to most beds and has a controlled and uniform traction
- Provides accurate focus of the traction force

CERVICAL TRACTION KIT

R-04

Sizes : Universal

- Ideal cervical traction kit designed to perform cervical traction in sitting posture.
- Will be beneficial in the following conditions cervical spondylosis, neck pain, stiffness in the neck and cervical disc injury.
- Holds the neck firmly without any discomfort and supports the neck during the application of traction.
- Soft padded head holder to ensure maximum comfort.
- Spreader bar holds the traction head holder and keeps the pulley rope flexible for movements.
- Water bag made of durable material to hold the required weight to perform traction.

PELVIC BINDER

Sizes : S | M | L | XL | 2XL | 3XL

- Made of soft foam bonded fabric
- 30 inch long two sturdy slings with triangle shaped buckle to give proper traction
- 8mm foam padding is given at the pelvic region to provide maximum comfort
- Hook and loop closures for easy application and adjustment
- Traction is applied through the side slings
- Pelvic traction is a therapy program designed to relieve pain in the lower back, hips, and legs associated with lower back disorders.
- Traction refers to the mechanisms for strengthening broken bones, immobilization, or relieving pressure on the skeletal system. They help treat fractures, dislocations, and long-duration muscle spasms to prevent or correct deformities. Traction can be short-term when used at an accident scene or long-term when used in a hospital setting.
